

Integra Cloud Fax®

Integra's suite of cloud fax solutions provides pharmacies immediate backup, redundancy, and allows your business to grow securely.

Integra Cloud Fax (ICF) is a comprehensive data transmission solution that replaces your existing fax set-up. ICF provides cloud failover and redundancy, while leveraging cloud technology for reliable, cost-effective communications. With ICF, pharmacies have access to A2E devices that can be provided to facilities. A2E devices are simple, plug-and-play solutions that allows any traditional fax machine to be extended to the cloud network.

No Busy Signal: Because there are no fax servers or lines, you are not limited in the number of faxes you receive. This means your customers will never get a busy signal when faxing to you.

Scalable & Flexible: As your business grows, the service expands to accommodate your needs.

Increased Reliability: Backups and redundancy prevent information loss due to natural and man-made disasters.

Proven Support: Fax solutions are fully supported by our first-class customer service department. Users can call the toll-free support line or email to get immediate, knowledgeable support.
