On-Demand, Scalable Faxing

Integra Cloud Fax (ICF) is a cloud-based fax solution designed specifically to help modernize your pharmacy's fax network. ICF provides pharmacies with a powerful, easy to use solution with enterprise-level flexibility. HIPAA compliant with no hidden fees, Integra Cloud Fax is extremely reliable and ensures your customers never receive a busy signal when faxing.

Scalable & Reliable

Eliminate the risks associated with traffic overflow and downtimes. ICF is capable of handling any volume, including unexpected fax spikes, so you can maintain business continuity when it matters most.

No Busy Signal

ICF never produces a busy signal. If a fax line is engaged or down due to natural or man-made disasters, the system automatically resends the fax until it is successfully transmitted.

Improved Service

Improve customer relationships by eliminating frustrations and reducing lost, duplicate, and late faxes. Get quick answers for customers by retrieving faxes immediately.

Redundancy & Backups

Automatic backup and high-level redundancy prevent information loss due to interruptions from natural and man-made disasters. With ICF, your fax system will always be ready to deliver when it matters most.

A2E Device

The A2E (analog to etherFAX) allows you to connect the facilities you serve to your ICF network with a simple plug-and-play device. Connect the device into a traditional fax line to guarantee fax delivery while your customers reap the benefits of cloud-based faxing.

- In-network guaranteed delivery
- Increased efficiency
- Safeguard against disaster
- Secure transmission

"My customers are happy with increased reliability. Management is happy with reduced costs. I am happy because ICF is secure, reliable, and redundant."

Cliff Hunt, Senior Care Pharmacy

"From my perspective as the IT Director, Integra Cloud Fax took a huge portion of my normal day-to-day support off my plate. I no longer have people complaining about busy signals."

Erik Dwelly, PCA Pharmacy
