L Logix®

Automate Your Pharmacy, Your Way

Turn your time-consuming, multi-click processes into a single click with Logix. Your input has allowed us to design easy-to-install workflow processes that give you control of the most cumbersome and time-consuming chokepoints in your pharmacy. Logix frees up your resources so you can grow your business, and better serve your customers.

Reduce or Eliminate Follow-up

Logix can remove the uncertainty of manual follow-up on Refill Requests, Prior Authorizations, Refill Too-Soons, and many other chokepoints inside your pharmacy. Logix will only notify you when something needs follow-up.

Eliminate Time-Consuming Errors

Eliminate operator errors from your workflows by setting up and creating pre-populated forms with all relevant data filled in and sent to your customers. When these schedules are not completed, Logix will notify you automatically.

Reduce Keystrokes and Mouse Clicks

Each one counts! With Logix processes in place, you can reduce document handling & processing times by an average of 1-4 minutes per document. Every keystroke you can remove creates more opportunities for growth.
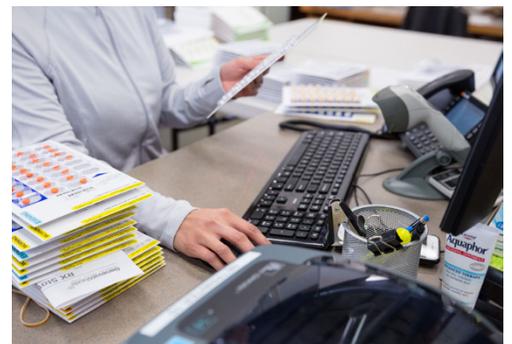

Increase Throughput w/o Adding Headcount

Increase your ability to process your most time-consuming processes without adding additional FTE. Use your team more efficiently and effectively.

Powered by Integra LTC Solutions

You know when we work with you, you get the world-class service and support you expect and deserve. Pick the process that best fits your workflow, and we will work with you to configure them based on your needs, not ours.

"What was once a process that took up to three full-time employees working all week was transformed into a single click."

Mary Glavan, Vice-President of Support Services - MACRx

"Logix has allowed us to free up an entire group of team members who can now focus on addressing customers' needs."

Mary Glavan, Vice-President of Support Services - MACRx
